PROFILE

I am an iOS & OS X developer seeking employment beginning summer 2015.

EXPERIENCE

Principal Developer/Consultant, Morris & Sons LLC   July 2014   Present

Currently developing Hipstamail, a universal iOS app that allows you to compose and send attractively typeset letters through the United States Postal Service. For this project, I taught myself Golang and built the backend from scratch.

Senior Software Developer, Bomgar Corporation   Feb 2012   Jun 2014

Software Developer, Bomgar Corporation   Feb 2008   Feb 2012

- Developed the first versions of the company's three iOS apps.
- Developed an iOS SDK that allows 3rd party app developers to integrate remote support capabilities into their apps.
- Serve as the SME for OS X, iOS, and other Apple technologies.
- Work in an expansive C/C++ codebase in service of several applications on half a dozen platforms.
- Mac/iOS dev infrastructure design and maintenance.
- Various skunkworks projects.
- Telecommuting Experience: Worked as a remote employee for over one year.

Software Engineer, CTI Inc   1999-2002

- Developed PET/CT visualization software.
- Developed motion control subsystem for an experimental PET/SPECT gantry.
